

**GEOG 4920 Internship Application
Supervisor Form
Department of Geography and the Environment
University of North Texas**

Students can receive credit for internships if the employment builds up on skills developed in courses and provides career-related workplace experiences.

Briefly describe the nature of the internship. A copy of the job description will be submitted by the student. Please elaborate on the tasks and projects that the student may be working on, as well as professional development opportunities they will have access to.

The student intern will submit a final report documenting what they learned during the internship that will be evaluated by faculty for the course grade. Students have flexibility in the type of report format (e.g., e-portfolio, ArcGIS story map, Word/pdf document). If there is information that should not be made publicly available, please discuss this with the student.
